SUMMARY

I am a Full Stack Software Engineer with 2 years of hands-on experience designing and developing enterprise applications using C, ASP.NET Core, React, and SQL Server (MSSQL). In addition, I bring 1.5 years of experience in operations support and virtual assistance, giving me a strong understanding of both technical and business processes. I have built and maintained REST APIs, SAP OData integrations, analytics dashboards, and workflow automation solutions, delivering scalable systems that improve operational efficiency and user experience. My experience spans the full software development lifecycle, from requirements gathering and system design to deployment and ongoing support.

EXPERIENCE

Berger Paints Bangladesh Limited

June 2024 – May 2026

Software Engineer

Dhaka, Bangladesh

- Engineered **3 production enterprise web applications** using ASP.NET Core, React, and SQL Server (MSSQL), supporting **200+ internal users** across R&D, QA, and supply chain departments.
- Built and deployed ASP.NET Core Web APIs consumed by React frontends, **reducing average data retrieval time by ~35%** through SQL query optimization and indexed schema design.
- Integrated SAP OData services into internal business applications, enabling real-time data sync between SAP ERP and web platforms.
- Collaborated with cross-functional stakeholders in an Agile environment to deliver **3 major projects** within planned timelines.
- Implemented automated reporting modules, **eliminating manual Excel-based tracking** for R&D and QA teams and saving an estimated **5+ hours per week**.
- Reduced bug backlog by **40%** over two quarters through systematic code reviews and refactoring of existing internal tools.

Digicon Technologies Limited

Apr. 2024 – May 2024

UI/UX Design Intern

Dhaka, Bangladesh

- Designed UI mockups and interactive prototypes in **Figma** for 2 web products, improving design-to-development handoff speed by providing developer-ready component specs.
- Contributed frontend design improvements and usability enhancements that were adopted into the production codebase.

All American Home Group

January 2019 – June 2020

Operations Support & Virtual Assistant (Contractual)

Remote

- Leveraged 1.5 years of experience in administrative operations to audit and organize **Lis Pendens tax records**, applying financial filters to prioritize high-value investment properties (valued at \$100k+) and ensuring accurate data categorization for stakeholder review.
- Administered secure document review and data entry protocols, ensuring 100% confidentiality for sensitive legal and operational files.
- Prioritized concurrent support tasks under strict daily timelines, maintaining high accuracy across digital database updates and file storage platforms.

PROJECTS

Dealer Intelligence Dashboard | ASP.NET, SQL Server, Google Maps API

- Built a data-driven analytics dashboard enabling business decision-making for a **500+ dealer network**; currently rolling out for nationwide use at Berger Paints Bangladesh Limited.
- Implemented KPI-based reporting with geo-based insights via Google Maps API; **reduced regional report generation from 2 days to under 30 minutes** using multi-level filtering.

- Designed configurable data visualization components that improved data accessibility for non-technical stakeholders.

R&D Process Log Automation System | *ASP.NET Core, Automated Job Scheduling , SQL Server*

- Developed a workflow automation system to track chemical and material processes in R&D operations at Dhaka Factory, replacing a fully manual process.
- Implemented time-based logging, automated report generation, and process tracking, **saving an estimated 10+ hours/week** of manual data entry for QA and monitoring teams.

Vendor Enlistment System | *ASP.NET Core, SharePoint API Integration, SQL Server*

- Built a vendor onboarding and approval platform for supply chain operations, digitizing a previously paper-based workflow and centralizing vendor data management.
- Designed multi-stage approval workflow that **reduced vendor registration processing time by ~60%** and eliminated manual administrative work for the procurement team.

EDUCATION

Independent University Bangladesh <i>Bachelor of Science in Computer Science & Engineering</i>	Jan. 2020 – Apr. 2024 CGPA: 3.46
Academia <i>A' Levels</i>	July 2017 – June 2019
Academia <i>O' Levels</i>	June 2016 – June 2017

SKILLS

Operations Support: Project Administration, Data Management, Document Review, CRM Operations, Business Correspondence, Records Retention, Task Prioritization

Frontend Development: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive UI Design, Figma

Backend Frameworks: C#, ASP.NET Core, REST API Development, PHP, Web API Architecture

Databases & Systems: SQL Server (MSSQL), SQL Query Optimization, Relational Database Design, Process Automation (Windows Task Scheduler), Job Scheduling

Tools & Methodology: Google Workspace, Microsoft Office (Excel, Word), Git Workflows, Code Repositories, Agile/Scrum, Jira, Trello, Postman, VS Code

Professional Communications: Bilingual English Fluency, Stakeholder Management, Inter-departmental Liaison, Executive Reporting
